

NaturaLaseQS

Q-SWITCHED YAG LASER

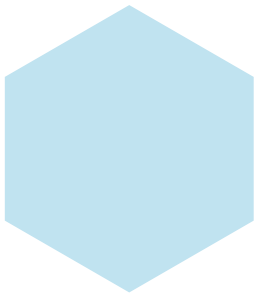

Tattoos & Pigmented Lesions

Photo Rejuvenation

Hair Removal

MULTI-APPLICATION SYSTEM

The Highest Pulse Energy Ever Offered

Focus Medical, a technology leader in aesthetic lasers, offers the NaturaLase QS, the only Q-switched Nd:YAG able to deliver 2 Joules of pulse energy. The NaturaLase QS is an incredibly versatile, reliable and well designed laser that creates multiple treatment opportunities from one system.

The NaturaLase QS has the power to bring laser
tattoo removal into the 21st century

Tattoo & Pigmented Lesion Removal

High Power to Deliver Better Results for More Colors

Expressing oneself with a tattoo may seem like a great idea but many people come to regret this decision later. NaturaLase QS technology eliminates tattoo inks, in a safe and effective manner.

High treatment energy equals fewer complications

The NaturaLase QS combines the largest spot sizes, with the most energy, and an extremely flat beam profile to deliver energy deeper into the skin with much less damage to the surface of the skin.

The most unique feature of the NaturaLase QS is power. This simple, yet vital, feature advances the standard of care in laser tattoo removal. The NaturaLase QS is able to deliver the highest energy of any laser at 4 separate wavelengths for quality results on multi-color tattoos.

The high power 1064 and 532 wavelengths also provide treatment opportunities for a wide variety of dermal and epidermal pigmented lesions. The nanosecond pulse width makes this technology suitable for all skin types.

	NaturaLase QS	Others
Flat Top Beam	Yes	No
Large Spot Sizes	Yes	No
High Powered	2 joules	up to 1 joule
Wavelengths	1064, 532, 585, 650	1064, 532
Technology	State of the Art	Older Technology

Photo Rejuvenation

Effective remodeling and sun damage treatment

Non-ablative skin rejuvenation with the 1064 wavelength is a proven performer, and a treatment your patients will love. The gentle Q-Switched energy has the peak power to cause a deep nonspecific wounding effect and the 1064 nm wavelength is much more penetrating than other “lunch-time” rejuvenation wavelengths so the energy goes deeper into the skin where new collagen can form. This procedure is performed without any skin damage or downtime, and is easily tolerated by even the most sensitive patients.

The 532 nm wavelength is emerging as a treatment for reduction of sun damage. Along with 1064 rejuvenation these treatments provide a comprehensive photo rejuvenation procedure that will rival any technology.

Hair Removal

Hair removal with the NaturaLase QS is a fast, safe, and easy procedure. Patient comfort is unmatched when using the NaturaLase QS, because the Q-switched energy leaves very little thermal energy in the skin. Less thermal energy makes this the safest hair removal treatment available. Hair removal with the NaturaLase QS is unmatched for fine hair removal and for dark skin comfort. Comfort, safety and speed (a 10 Hz treatment rate) will give the NaturaLase QS hair removal procedure a prominent place in your clinical offerings.

NaturaLase QS Laser Specifications

Laser Source: Nd:YAG

Delivery System: Articulated Arm

Dimensions: 27" (66cm) x 17" (43 cm) x 50" (124 cm)

Weight: 275 Lbs. (125 kg)

Power requirements: 100, 120, 200, 220 or 240 VAC

Wavelength	1064 nm	532 nm	585 nm	650 nm
Fluence	28.3 J/cm ²	12.7 J/cm ²	17.5 J/cm ²	12.7 J/cm ²
Spot Size	3 to 10 mm		2 to 6 mm	
Pulse Energy	2000 mJ	900 mJ	550 mJ	400 mJ
Beam Adjustment	Zoom Columnated		Fixed by Distance
